

MOLECULAR MEDICINE & MECHANISMS OF DISEASE

Molecular Medicine & Mechanisms of Disease (M3D) Ph.D. Program

The M3D Ph.D. Program trains students to use advances in basic sciences to solve problems relevant to human disease; and to use insights from human disease processes to solve fundamental biological problems. Three core courses focus on mechanisms of disease, the impact of basic science on medicine, and human genetics, providing a rigorous intellectual foundation. Each student participates in Chief of Medicine rounds, and in a mentored clinical rotation, in the broad area of human genetics or in a more focused area relevant to the student's thesis research. Students also choose electives reflecting their own interests from the deep and varied menu offered by UW basic science and engineering departments. Thesis research is supervised by two mentors, one a basic scientist and the other a clinician scientist. Students complement their experimental work with exposure to relevant problems in the clinic. The M3D Program is designed for students to complete Ph.D. training in five years, ready to take the next step in careers in academia, biotech, the pharmaceutical industry, education, publishing and public policy.

MOLECULAR MEDICINE & MECHANISMS OF DISEASE

Applying to the M3D Ph.D. Program

1. Create an application online through the University of Washington Graduate School website.

- **Select "Pathology" from the menu of departments and programs. The interdisciplinary M3D program is based in the Department of Pathology.**
- **Complete all sections of the application**
- **Upload unofficial transcripts**
- **Self-report GRE scores**
- **Letters of reference: the application will ask you to identify those who will be submitting letters on your behalf and provide their email addresses. The application system will contact them automatically with instructions about how to submit their letters. Be sure you contact them first to confirm that they are willing and able to provide a recommendation.**

2. Pay the application fee online using a Mastercard or Visa debit/credit card. For current information about the fee and fee waivers, please see the Graduate School Application Information page. Please note that the fee is assessed by the Graduate School, not the M3D program. The M3D program therefore cannot approve fee waivers as all requests must be made directly to the Graduate School.

3. Have your official GRE score report submitted directly by ETS. The UW Institution Code is 4854.

4. For international or ESL applicants only, a Certified TOEFL Score Report must be submitted directly by ETS. The UW Institution Code is 4854.

5. All materials must be received by December 3, 2018.

6. Top candidates will be contacted for interviews.

7. Admissions decisions will be made by late February or early March.

MOLECULAR MEDICINE & MECHANISMS OF DISEASE

Diversity/Equal Access to Learning Opportunities for All Students

The Molecular Medicine and Mechanisms of Disease (M3D) Ph.D. Program is committed to recruiting diverse participants, including students with a broad spectrum of scientific interests, students from underrepresented racial and ethnic groups, students with physical or mental impairments that limit any major life activity, and students from economically or educationally disadvantaged backgrounds.

In addition, the University of Washington is committed to providing equitable access to learning opportunities for all students through universal design and reasonable accommodation. Disability Resources for Students (DRS) is the campus office that collaborates with students who have disabilities to provide and/or arrange reasonable accommodations.

If you have, or think you may have, a disability (e.g., mental health, attentional, learning, chronic health, sensory, or physical), please contact the (DRS) to arrange a confidential discussion regarding equitable access and reasonable accommodations.
